Matter HC/S 214/2026 — Meridian Robotics Pte Ltd v Vantage Components Pte Ltd

From: Wei Ling Tan <wl.tan@meridianrobotics.com.sg>

To: Marcus Ho <marcus.ho@hoandpartners.com.sg>

Date: 14 March 2026

Subject: Defective Servo Units - Vantage Components

Marcus,

Following our call, I'm attaching the batch inspection reports for the servo units supplied by Vantage Components under PO-2025-1187. Our QA team has flagged failure rates of 22% against the contractual specification of <2%.

We believe Vantage's internal defect logs (which they have refused to share informally) will show they knew about a manufacturing tolerance issue before shipment. We need those logs to make out our case for breach of the Supply Agreement dated 3 June 2025.

Can we compel production of these?

Wei Ling

Date: 15 March 2026

Subject: RE: Defective Servo Units - Vantage Components

Wei Ling,

Thanks for this. We wrote to Vantage's solicitors on 20 February requesting voluntary production of (i) internal QA/defect logs for the relevant production run, and (ii) any correspondence between Vantage and its Shenzhen sub-contractor regarding tolerance deviations. They declined on 6 March, citing confidentiality.

Given the refusal, I recommend we file an application for specific production under the Rules of Court 2021. I'll have a draft ready for your review by early next week.

Marcus

Understood, please proceed. Also separately - can your team review the revised supply agreement Vantage's new distributor wants us to sign for the 2026 order? Not urgent, just want it looked at before we commit to anything.

Wei Ling
